

Course number	G-AAA02 52604 LJ31				
Course title (and course title in English)	アフリカ環境学 Environmental Studies in Africa		Instructor's name, job title, and department of affiliation	Graduate School of Asian and African Area Studies Professor,OYAMA SHUICHI	
Target year	1st & 2nd year students	Number of credits	2	Year/semesters	2024/First semester
Days and periods	Wed.2	Class style	Lecture (Face-to-face course)	Language of instruction	Japanese
[Overview and purpose of the course]					
<p>In recent years, when we carry out surveys in Africa, we have found amazing phenomenon at the huge number of changes that have taken place, in moreover, all sorts of spheres: in the population increase and urbanization, in the economy (oil and mineral exploitation, flow of goods, activities of foreign investors), in the environment (use of forest resources, the effect of ecosystems, and climate change), and in the legal and electoral systems. In this class we will consider the transformations that are occurring in natural and social environments of Africa and how researchers should approach them, through lectures and practical training.</p>					
[Course objectives]					
<p>You understand the changes of physical and social environments in sub-Saharan Africa and acquire the multiple skills for data-collection and analysis.</p>					
[Course schedule and contents]					
<p>Lectures will take place on the following topics.</p> <ol style="list-style-type: none"> 1. Explanation of class and preliminary arrangements 2. Nature in Africa (1) 3. Nature in Africa (2) 4. Nature in Africa (3) 5. Area Study and character of researcher 6. Land tenure system 7. Globalization and the poverty issue 8. Are African peasant farmers poor? 9. Why are there witchcrafts in Africa? 10. Climate change and desertification 11. Circulation economy and urban-rural nutrition transfer 12. Armed conflict among farmers and herders in Sahel 13. Why does terrorism occur? 14. The potential of Area Studies and its contribution to society 15. Summing up <p>Please note that lectures may be adapted in accordance with the number of students and their interests and concerns. I will adopt several times of practices using laptop computer with MS-excel and free software.</p>					
<p>----- Continue to アフリカ環境学 (2)</p>					

アフリカ環境学 (2)

[Course requirements]

None

[Evaluation methods and policy]

Evaluation will be based on a combination of two things: evidence of understanding of lecture content (60%) and report for practices (40%).

[Textbooks]

Instructed during class

[References, etc.]

(Reference books)

Introduced during class

[Study outside of class (preparation and review)]

About practices, we use the laptop computer with free downloaded software and MS-excel. You need to work for the practices, other than time of class.

(Other information (office hours, etc.))

The instructor's office hours will be from 4pm to 6pm every day of the week (Monday to Friday). However, there will be times when I am absent for faculty meeting and academic conferences, etc., so students are required to get appointment times via oyama.shuichi.3r[@]kyoto-u.ac.jp. I will do my best to meet your requests.

*Please visit KULASIS to find out about office hours.

Course title (and course title in English)	生態史論 Historical Ecology		Instructor's name, job title, and department of affiliation	Graduate School of Asian and African Area Studies Associate Professor, YASUOKA HIROKAZU	
Target year	From 1st to 5th year students	Number of credits	2	Year/semesters	2024/Second semester
Days and periods	Wed.2	Class style	Lecture (Face-to-face course)	Language of instruction	Japanese
[Overview and purpose of the course]					
The instructor gives lectures on human-ecosystem interactions and its historical change, referring to a variety of case studies of the Central African Forest, and then students and the instructor will discuss how relevant human-ecosystem interaction studies are to the issues of biodiversity conservation and sustainable development.					
[Course objectives]					
By the end of this course, students will have gained: (1) An appreciation of the ways in which indigenous ecological knowledge and cultural practices, as well as broader political and economic systems, shape diverse human-ecosystem interactions, and how human activities affected, positively and negatively, the ecosystems. (2) An appreciation of importance of human-ecosystem interaction studies on the issues of biodiversity conservation and sustainable development.

Course number	G-AAA02 52503 LB31				
Course title (and course title in English)	相互行為論 Interaction Studies		Instructor's name, job title, and department of affiliation	Graduate School of Asian and African Area Studies Professor, TAKADA AKIRA	
Target year	1st & 2nd year students	Number of credits	2	Year/semesters	2024/First semester
Days and periods	Tue.4	Class style	Lecture (Face-to-face course)	Language of instruction	Japanese and English
[Overview and purpose of the course]					
Using multi-disciplinary research data I have collected, this course discusses the entwined relationships between human activities and the environment with special emphasis on the exchange of various natural and social resources among people in contemporary African societies. Each year, I will select a theme pertaining to this subject and develop empirical and theoretical arguments together with the course participants. In the 2024 course, we will reconsider hunter-gatherer childhood with setting "play" as the key concept, based on both the lecturer's field research on several groups of San and the literature review of the relevant studies of the wider hunter-gatherer groups.					
[Course objectives]					
In this course, we will develop the above areas of interest by analyzing selected domains of child play based on ethnographic materials.					
[Course schedule and contents]					
This course deals with the following topics, each of which lasts one or two weeks. The topics may be modified according to the interests of the class. The lectures are given mostly in English, although I will use Japanese if all of the students are Japanese.					
<ol style="list-style-type: none"> 1. Children in the Wild 2. The Last Hunter-Gatherers of the Kalahari 3. Minding Hunter-Gatherer Childhood 4. Children and Play 5. Pleasure in nursing 6. Playful Gymnastics 7. The Joy of Early Vocal Communication 8. Imitation in Playful Activities 9. Socialization through Singing-and-Dancing Activities 10. Play and Work 11. Reconsidering Human Childhood 					
[Course requirements]					
None

Course title (and course title in English)	生業とものづくり Livelihoods and Creativities in Africa		Instructor's name, job title, and department of affiliation	Graduate School of Asian and African Area Studies Associate Professor, KANEKO MORIE	
Target year	1st & 2nd year students	Number of credits	2	Year/semesters	2024/Intensive, Second semester
Days and periods	Intensive	Class style	Lecture (Face-to-face course)	Language of instruction	Japanese
[Overview and purpose of the course]					
<p>One of the most important parts of daily life in contemporary Africa consists of livelihood activities, such as agriculture, cattle breeding, craftworks, retail, etc. In this lecture, the speaker discusses her fieldwork on some of these activities, including agricultural techniques, craftwork and souvenir-making, focusing on human-object relationships. By sharing the results of this fieldwork, we will shed light on local peoples' attitudes to environmental and social transformation in contemporary Africa, the importance of human-object relationships in African life, and the creativity generated through interactions between researchers and local people in the context of livelihood.</p>					
[Course objectives]					
<p>After understanding anthropological approaches to livelihoods in contemporary African context by focusing on human-objects relationships, and students who take the lecture learn and practice discussion on local peoples' attitudes to transformation of the environment and social situations in contemporary African context.</p>					
[Course schedule and contents]					
<ol style="list-style-type: none"> 1. Introduction 2. Craftworks as livelihoods in contemporary African context (1) 3. Craftworks as livelihoods in contemporary African context (2) 4. Craftworks as livelihoods in contemporary African context (3) 5. Craftworks as livelihoods in contemporary African context (4) 6. Possibilities of relationship between fieldworks and human-objects relationships in contemporary African context (1) 7. Human-objects relationships in Agricultural activities (1) 8. Human-objects relationships in Agricultural activities (2) 9. Human-objects relationships in Agricultural activities (3) 10. Human-objects relationships in Agricultural activities (4) 11. Course number	G-AAA02 52403 LJ31				
Course title (and course title in English)	野生動物保全論 Wildlife Conservation		Instructor's name, job title, and department of affiliation	Graduate School of Asian and African Area Studies Professor, YAMAKOSHI GEN	
Target year	1st & 2nd year students	Number of credits	2	Year/semesters	2024/First semester
Days and periods	Fri.4	Class style	Lecture (Face-to-face course)	Language of instruction	Japanese
[Overview and purpose of the course]					
Wildlife conservation is an important global issue since it concerns the preservation of biodiversity in a whole variety of ecosystems all over the world. On the other hand, for the people who live in the habitats of the endangered animals, wildlife conservation is "their own" problem highly specific to the region, and based on a particular local history and their way of thinking towards animals. In this class we will take a fresh look at wildlife conservation as one contemporary problem in which global and local concerns intersect. Students will gain an understanding of the relevant basic concepts through a range of readings and class discussion.					
[Course objectives]					
Students are expected to acquire basic knowledge about keywords which are taken up at the class, to use such keywords in active discussions at the class, in anticipation of eventually activate ideas obtained through such discussions during field researches.					
[Course schedule and contents]					
Class schedule and contents will be decided in consultation with students at the first meeting. The tentative curriculum is as follows:					
Week 1: Explanation of the direction of the class.					
Weeks 2-7: In these weeks, We will discuss and understand diverse approaches to nature conservation, using specific examples. Main discussion points: "Who" is protecting "what kind" of nature, by "which methods," and for "what purposes"? Debates on preservation v.s. conservation, the rights and wrongs of artificial intervention, protected areas and colonialism.					
Weeks 8-10: In these weeks, we will look at the debates on environmental conservation, and try to deepen the understanding by putting the debates in broader contexts of Area Studies. Main discussion points: Participatory development debates, humanitarian intervention, market and neo-liberalism, wholism in conservation.					
Weeks 11-15: In these weeks we will choose certain keywords, depending on the interests of students in the class, and have discussions on the specific sets of problems.					
----- Continue to 野生動物保全論 (2)					

野生動物保全論 (2)

Keyword examples:

Biodiversity, environmental sustainability, the problem of invasive alien species, resilience, ecological philosophy, the "Should Trees Have Standing" debate, the Animal Rights debate, citizens' rights movements and nature conservation philosophy, animal welfare and empathy, alpinism and adventure, nature esthetics, the birth and history of landscape paintings, nature writing and correspondence, religion and environmentalism.

[Course requirements]

None

[Evaluation methods and policy]

Evaluation will be based on active participation in class with questions and expression of opinions, and discussion skills.

[Textbooks]

Course number	G-AAA02 82605 LJ31				
Course title (and course title in English)	水・衛生論 Water, Sanitation and Hygiene		Instructor's name, job title, and department of affiliation	Graduate School of Asian and African Area Studies Associate Professor, HARADA HIDENORI	
Target year	From 1st to 5th year students	Number of credits	2	Year/semesters	2024/First semester
Days and periods	Fri.5	Class style	Lecture (Face-to-face course)	Language of instruction	Japanese
[Overview and purpose of the course]					
Water is vital for human life, and excreta (human waste) is necessarily generated from daily life. Securing water, sanitation and hygiene (called WASH) is one of the major challenges in sub-Saharan Africa. In this course, students will learn the present conditions, impact on health and the environment, management, and human-environment-society interaction of WASH, followed by a discussion on how to achieve WASH for sub-Saharan Africa. Students will also learn how to obtain physicochemical and microbiological data on WASH in the field.					
[Course objectives]					
Students will understand (1) the impact of WASH on health, (2) the impact of WASH on material cycle and the environment, (3) the socio-environment-society interaction of WASH, and (4) the data of quantity and quality of WASH					
[Course schedule and contents]					
Week 1: Introduction to Global WASH 1 Week 2: Introduction to Global WASH 2 Week 3: WASH and health 1 Week 4: WASH and health 2 Week 5: WASH and material cycle 1 Week 6: WASH and material cycle 2 Week 7: WASH and society 1 Week 8: WASH and society 2 Week 9: Practice of WASH condition surveys 1 Week 10: Practice of WASH condition surveys 2 Week 11: Practice of WASH condition surveys 3 Week 12: Presentation on WASH in sub-Saharan Africa 1 Week 13: Presentation on WASH in sub-Saharan Africa 2 Week 14: Presentation on WASH in sub-Saharan Africa 3 Week 15: Feedback The schedule and contents may change depending on the number of students and their background. The coursework includes the experimental measurement of quantity and quality of WASH and their data analysis (Week 9-11), and student presentations (Week 12-14).					
----- Continue to 水・衛生論(2)					

水・衛生論(2)

[Course requirements]

Course number	G-AAA02 52807 LJ31				
Course title (and course title in English)	熱帯病学 Tropical Diseases		Instructor's name, job title, and department of affiliation	Kansai Medical University Professor NISHIYAMA TOSHIMASA	
Target year	1st & 2nd year students	Number of credits	2	Year/semesters	2024/First semester
Days and periods	Tue.2	Class style	Lecture (Face-to-face course)	Language of instruction	Japanese
[Overview and purpose of the course]					
Many students of the Graduate School of Asian and African Area Studies conduct a field research in Asia and Africa, where various kinds of infectious diseases, which does not exist in Japan, are observed. This lecture aims to deepen the knowledge on tropical diseases and the practical methods to conduct a field research healthily.					
[Course objectives]					
Students will acquire the knowledge on 1) endemic diseases in their research field, 2) self-management skills for their health in the field, and 3) preventive measures against tropical diseases and their treatment.					
[Course schedule and contents]					
1st lecture: An introduction to the study of tropical diseases 2nd lecture: Mosquito-borne Diseases I: Malaria 3rd lecture: Mosquito-borne Diseases II: Dengue fever, Yellow fever, Chikungunya fever, West Nile fever, etc. 4th lecture: Mosquito-borne Diseases III: Bancroftian filariasis, Malayan filariasis etc. 5th lecture: Tick-borne Diseases: Scrub typhus, Spotted fever, Tick borne encephalitis, Crimean Congo hemorrhagic fever, Lyme disease, etc. 6th lecture: Fly-borne Diseases: Leishmaniasis, Sleeping sickness, Onchocerciasis, Loasis, Cordylobia anthoropophaga, etc. 7th lecture: Transcutaneous Infection: Schistosomiasis, Hookworm disease, Strongyloidiasis, Leptospirosis, etc. 8th lecture: Orally Transmitted Viral Diseases: Hepatitis A and E, Norovirus infection, Rotavirus infection, Poliomyelitis, etc. 9th lecture: Orally Transmitted Bacterial Diseases: Escherichia coli infection, Shigellosis, Typhoid fever, Salmonella infection, Cholera, Campylobacter infection, etc. 10th lecture: Orally Transmitted Parasitic Diseases I: Amoebic dysentery, Toxoplasmosis, Giardiasis, Ascariasis, etc. 11th lecture: Orally Transmitted Parasitic Diseases II: Hookworm disease, Trichuriasis, Clonorchiasis, Fasciolopsiasis, Fascioliasis, Heterophyiasis, Paragonimiasis 12th lecture: Infectious diseases caused by mammal bite and sexually transmitted diseases: Rabies, Tetanus, Herpes B virus infection, Pasteurella infection, HIV infection, Syphilis, Gonorrhea, Chlamydia infection, etc. 13th lecture: How to use simple test kit for malaria and dengue fever (incl. practical exercise) 14th lecture: 1) Sickness in the airplane and its prevention, 2) How to customize the plan of your travel insurance					
Continue to 熱帯病学(2)					

熱帯病学(2)

15th lecture: Which vaccines to choose and how to plan the schedule for vaccination

[Course requirements]

Desirable for students who learned biology in high school, but NOT REQUIRED

[Evaluation methods and policy]

Evaluation will be based on a report. The content of the report will include: 1) your research field, 2) sickness popular in your field and measures to prevent infection, 3) what to do when infected.

Course title (and course title in English)	アフリカ政治論 African Politics		Instructor's name, job title, and department of affiliation	龍谷大学法学部 教授 OCHIAI TAKEHIKO	
Target year	From 1st to 5th year students	Number of credits	2	Year/semesters	2024/First semester
Days and periods	Thu.2	Class style	Lecture (Face-to-face course)	Language of instruction	Japanese
[Overview and purpose of the course]					
This class provides an introduction to contemporary African politics. The core question motivating the course is: Why do some African countries suffer from high levels of political violence while others have not? We will study many individual cases and students are expected to try to apply the tools of political science to find some general answers to the question.					
[Course objectives]					
At the end of this class, students will be able to: 1. Understand the political background and the political forces in operation. 2. Examine contemporary African political issues.					
[Course schedule and contents]					
The following topics will be discussed. 1. Ethnicity, Religion, Economic Class 2. Colonialism, Colonial Rule 3. Neo-Colonialism and Colonial Legacy 4. Political System 5. Regional Organization 6. Proxy Wars During the Cold War 7. Democratisation and Conflict

Course title (and course title in English)	牧畜文化論 Culture and Society of Nomadic Peoples		Instructor's name, job title, and department of affiliation	徳島大学大学院社会産業理工学研究科 准教授 NAITO NAOKI	
Target year	From 1st to 5th year students	Number of credits	2	Year/semesters	2024/Intensive, Second semester
Days and periods	Intensive	Class style	Lecture (Face-to-face course)	Language of instruction	Japanese
[Overview and purpose of the course]					
<p>This course discusses the dynamics of place construction by human/non-human assemblages in contemporary African pastoral societies, using multi-disciplinary theories, ethnographies and research data I have collected. Each year, I will select a theme pertaining to this subject and develop empirical and theoretical arguments together with the course participants. In the 2023 course, we will consider the ecology of place with setting "assemblage" as the key concept, based on both the lecturer's field research on East African pastoralists and the literature review of the relevant studies such as anthropology of domestication, landscape, place and anthropocene.</p>					
[Course objectives]					
<p>In this course, we will develop the above areas of interest by analyzing selected domains of place and human/non-human assemblage based on ethnographic materials.</p>					
[Course schedule and contents]					
<p>This course deals with the following topics, each of which lasts two or three weeks. The topics may be modified according to the interests of the class. The lectures are given mostly in English, although I will use Japanese if all of the students are Japanese.</p> <ol style="list-style-type: none"> 1. Ecology and evolution of pastoralism 2-3. The domestication of animals 4. Socio cultural aspects of pastoral societies in Africa 1: Age system and polygamy 5. Socio cultural aspects of pastoral societies in Africa 2: Begging as a mode of communication 6-7. Development and sedentarization in East African pastoral societies 8-9. The impact of Market economy, nation state and media in East African pastoral societies 10-11. Conflict, refugee and peace in East African pastoral societies 12-13. Anthropology of space and place 14-15. Human/Non-human assemblage in East African pastoral societies: Towards the ecology of place

牧畜文化論(2)

[Evaluation methods and policy]

Grading is based primarily on reports and class discussions, with weight given to active engagement in class.

[Textbooks]

Handouts will be provided in class.

[References, etc.]

(Reference books)

Tsing, Anna 『The Mushroom at the End of the World: On the Possibility of Life in Capitalist Ruins.』 (Princeton University Press, 2017) ISBN:4622088318

Other reference documents will be introduced during classes.

[Study outside of class (preparation and review)]

Students will be required to submit two reports, one at the beginning and one during the middle of the course. Details about these reports will be provided in class.

(Other information (office hours, etc.))

Please send your questions to naito.naoki@tokushima-u.ac.jp. The professor will accept and respond to emails accordingly.

*Please visit KULASIS to find out about office hours.

Course title (and course title in English)	Innovative Africa and SDGs Innovative Africa and SDGs		Instructor's name, job title, and department of affiliation	Graduate School of Asian and African Area Studies Professor, TAKAHASHI MOTOKI Graduate School of Asian and African Area Studies Professor, Hirano-Nomoto Misa Graduate School of Asian and African Area Studies Associate Professor, KANEKO MORIE Graduate School of Asian and African Area Studies Associate Professor, HARADA HIDENORI Graduate School of Asian and African Area Studies Assistant Professor, NAKAO SEIJI Graduate School of Asian and African Area Studies Assistant Professor, AMO KAE		
Target year	From 1st to 5th year students	Number of credits	2	Year/semesters	2024/Intensive, Second semester	
Days and periods	Intensive	Class style	Lecture (Face-to-face course)	Language of instruction	English	
[Overview and purpose of the course]						
<p>In order to achieve sustainable development in Africa, we need to address the existing problems and promote technological and social innovation while also learning about the initiatives taken in Africa as well as the formation of local knowledge in communities. Thus, in this course, we offer a holistic view on Africa and the African potential from its ecological, economic, political, technological, cultural, and historical backgrounds from diverse disciplines. We also encourage the mutual exchanges of ideas between the students from African countries and the students studying African affairs. This course is associated with the Innovative Africa program (IAfP), and, as a part of this course, the students will present at the International-Joint Conference of IAfP.</p>						
[Course objectives]						
<p>In this course, we will provide a holistic view on Africa from diverse disciplines and develop students' studies.</p>

Course number	G-AAA02 82812 PB31				
Course title (and course title in English)	フィールド統計学 Statistics for Field Science		Instructor's name, job title, and department of affiliation	Part-time Lecturer,Hongo Shun	
Target year	From 1st to 5th year students	Number of credits	1	Year/semesters	2024/Intensive, Second semester
Days and periods	Intensive	Class style	Lecture and practical training (Face-to-face course)	Language of instruction	Japanese
[Overview and purpose of the course]					
<p>Do we need statistics for field research? The answer can be yes or no, depending on what you want to express from the information (data) you obtain in the field. However, it ' s important to understand when you need statistics, which statistical methods are suitable for your data, and the nature of the data that statistical analysis assumes.</p> <p>This course starts with knowing when statistics is necessary and unnecessary in field research and covers the “ basic statistics for field researchers, ” including statistical estimation and tests, data independence, random sampling, probability distributions and regression analysis. The course also covers planning a field survey and analysing field data, using examples typical in field research. In addition to these lectures, we ' ll spend sufficient time on exercises using the R, a free statistical software, for the students to learn the basics of statistical analysis.</p>					
[Course objectives]					
<p>(1) Understand the minimum statistical knowledge base required for field research.</p> <p>(2) Be able to design field research designs that contemplate statistical treatments (e.g., estimation and statistical tests).</p> <p>(3) Understand the flow of statistical analysis of data typical of field research and roughly grasp performing analyses using R.</p>					
[Course schedule and contents]					
<p>1. When statistics are needed for field research: Descriptive and inferential statistics</p> <p>2. Survey design for using inferential statistics: Data independence and random sampling</p> <p>3-4. Exercise 1: Designing a survey using R</p> <p>5. Estimation: Thinking behind the data</p> <p>6. Statistical test: What does 'significant difference' mean?</p> <p>7-8. Exercise 2: Bootstrapping and randomisation tests</p> <p>9. Statistical analysis flow and illustrating data</p> <p>10. Probability distributions and statistical modelling</p> <p>11-12. Exercise 3: Making and illustrating data</p> <p>13. Linear models (LM) and generalised linear models (GLM)</p> <p>14. Evaluating models: Model diagnostics, likelihood ratio tests and AIC</p> <p>15. Exercise 4: Creating GLMs in R</p>

Course number	G-AAA02 52851 SB31				
Course title (and course title in English)	アフリカ地域研究演習 I Research Seminar on African Area Studies I		Instructor's name, job title, and department of affiliation	Graduate School of Asian and African Area Studies Professor, All the teaching staff at the division of Africa Area Studies	
Target year	1st & 2nd year students	Number of credits	3	Year/semesters	2024/First semester
Days and periods	Wed.3	Class style	Seminar (Face-to-face course)	Language of instruction	Japanese and English
[Overview and purpose of the course]					
Students will learn basic issues and methods in African area studies.					
[Course objectives]					
Students will be able to understand the characteristics of African area studies and acquire the ability to set their own research projects.					
[Course schedule and contents]					
Students will take in turns to give presentations on their ideas for research topics, the progress they are making in their research, and their findings. The class will then discuss the contents of their presentations, which it is hoped will deepen the understanding of the whole class on various areas in Africa. The order of presentation will be decided at the first seminar.					
[Course requirements]					
For students who have not yet passed their pre-doctoral thesis supervising committee review.					
[Evaluation methods and policy]					
Evaluation will depend on content of individual research reports, attendance at seminars, and active contribution to the discussion.					
[Textbooks]					
Not used					
[References, etc.]					
(Reference books) Introduced during class					
[Study outside of class (preparation and review)]					
Because the contents of each presentation will be notified in advance, each student should prepare on them. After the seminar, the understanding through the seminar should be deepen by discussion and literature.
