

**Variation of Vegetational Landscape in miombo woodland and mopane vegetation  
-View from ecological environment and human activities as factors of  
landscape formation-**

**Place:** FRIM (Forest Research Institute of Malawi, Zomba)

**Date:** 11 Sep, 2009 10:00~13:00

**Program:**

Introduction (10 min)

Speaker 1: Yuichiro Fujioka (Research Fellow of JSPS, Kyoto University)

“Mutual Changes in Tree Use by Local People and in Creation of Semi-natural Vegetation in North-central Namibia” (30 min; presentation 20 min. and discussion 10 min.)

Speaker 2: Koki Teshirogi (Graduate student, Kyoto University)

“Effects of Geomorphologic Environments on the Vegetational Landscape in Northern Namibia” (30 min)

- Short Break (5 min) -

Speaker 3: Chisato Yamashina (Graduate student, Kyoto University)

“Termite-mounds and Trees in Mopane Savanna in Northwestern Namibia” (30 min)

Speaker 4: Tomohiro Fujita (Graduate student, Kyoto University)

“The Effect of Fire to Miombo Woodland Dynamics in Malawi” (30 min)

- Short Break (5 min) -

Discussion

Comments: Henry Utila ( FRIM) and Paulos Mwale (FRIM)
